Management Skills Workshop TICKETS ON SALE!

DELIVERED BY LPD ASSOCIATES

Surrounding yourself with an effective team is a crucial key to long-term success. However, team effectiveness is too often left to chance, leading to demotivated and isolated individuals who inevitably underperform. This course helps you to understand the role of leader from your own perspective and that of your team. You'll also develop new insights into what it takes to lead an effective team and how to get the best from team members.

Content will include topics such as the key characteristics of effective leaders, making the organisation's vision 'live' for the team, understanding motivation, strategies for managing difficult behaviour and making the transition from team member to leader.

By the end of the workshop, participants will:

- Identify the qualities of a good leader
- Benchmark yourself against these qualities and plan actions for improvement
- Understand the value of sharing the vision with the team and use it to develop team goals
- Motivate team members by understanding and developing their drivers
- Handle difficult team members
- Challenge team members meaningfully and effectively
